# VODPROM

## WHO WE ARE

**VODPROM** is a water resource operator, a special project company that has the UNICAP GLOBAL international investment fund as an anchor partner, and is a key element of the **COSMIC GLOBO\*** Multiverse.

**VODPROM** is an ecosystem (single mechanism) that allows the society/state/corporations to jointly make global decisions. Here, the society chooses the development vector and goals, the state helps implement decisions, the corporations bring goals to life and make them cost-effective thanks to its own **TRINITY\*** platform.

## MISSION

One of the main missions of the project is to create a new effective model of relations between the society - states - corporations.

## KEY EXPERIENCE

**\$6+billion**

Thanks to joint work with a number of international investment companies, the CULLIGAN Corporation development project was implemented, which led to a record! increase in the corporation capitalization by \$6+billion and provided a significant income to investors and shareholders.

## WHAT WE OFFER

**We transfer online the modernized housing and communal services sector to the trust of society thanks to the VOD token, which:**

- 1. Provides an open and equal dialogue between the state-society-corporations through its own blockchain-based TRINITY platform;**
- 2. Creates a new unique financial instrument - profit from owning NFT tokens that are water treatment facilities, in partnership with leading transnational corporations within 30 years with guarantees from the state partner and the UNICAP investment fund;**
- 3. Provides an opportunity for additional income upon holding ICO and entering the VOD token to the exchange.**

## ADVANTAGES OF PARTNERSHIP

**VODPROM** builds, modernizes, adjusts industrial and social infrastructure facilities by connecting the digital world with the real one, creating financial stability thanks to NFT and DeFi;

**VODPROM** ensures the development of an open and equal dialogue with the state and corporations, eliminating the possibility of falsification and corruption thanks to blockchain;

**VODPROM** provides risk diversification through geographic and industry segmentation of projects, as well as provides lower transaction fees and, accordingly, a lower entry threshold based on the scale of the project portfolio;

**VODPROM** offers professional and competent management with relevant education and experience based on corporate culture, dependent on the result of working in partnership with leading global corporations;

**VODPROM** provides the maximum income thanks to the efficient management and an opportunity to widely access the necessary information, thanks to its own **TRINITY** platform;

**VODPROM** creates a high degree of the token liquidity, thanks to a partnership with the state - the most reliable economic entity in the modern developed economy, which ensures the safe and market-independent development for decades, without any crises and shocks;

**VODPROM** provides an extensive portfolio of profitable blue ocean projects in the promising investment-intensive highly profitable and guaranteed long-term market of scarce national water resources – “oil of the XXI century”;

**VODPROM** conducts an important humanitarian mission of implementing socially significant infrastructural and environmental initiatives on a global scale;

**VODPROM** provides an opportunity to significantly increase the token cost after the ICO and entry to the exchange;

**VODPROM** provides an opportunity to vote on the choice of regions for the modernization and construction of water treatment facilities, gets an opportunity to have complete information, monitor and control the use of financial, energy, environmental resources thanks to its own **TRINITY** platform;

**VODPROM** provides an opportunity for every inhabitant of the Earth, along with the heads of states and corporations, to take the responsibility for the ecological future of the planet.
